

NXP-RM-RP-E / NXP-RM-RP-E-PI

DISCONTINUED

XIRIUM PRO Receiver RX Repeater Module, power cable NKXPF-1-3 and antenna NXPA-6-360-25 must be ordered separately

Exceeding boundaries

The repeater is the perfect extension of the system: When used, the system range can be doubled, and walls, corners, or other obstacles may be overcome.

Extended true diversity for even more reliable reception

Since the repeater duplicates and forwards the signals received from the transmitter it becomes a second, redundant audio source for every receiver. Each receiver automatically selects the best signal and switches between them without interruption.
