

HANDLING INSTRUCTION opticalCON[®] MTP[®] Maintenance

www.neutrik.com

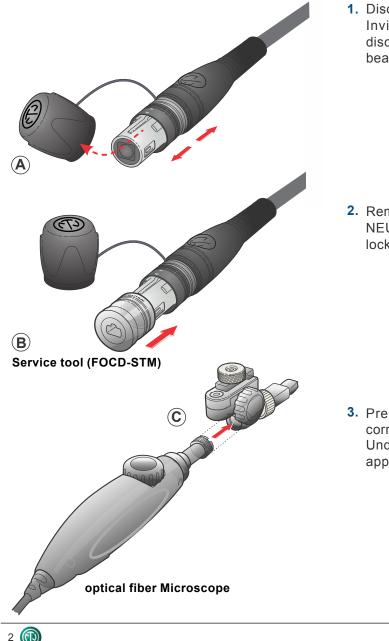

CAUTION: Laser radiation, do not look directly into beam of light!

The sealing shutter mechanism of the opticalCON[®] avoids contamination of the MTP[®] ferrule locked inside. The dust-proof design reduces maintenance intervals to a minimum; if nevertheless necessary, follows the maintenance procedure below to avoid damages on the due to inpropes cleaning.

A. Connector Cleaning / Inspection

Intervall:	every 500 matings recommended
Tools:	 NEUTRIK[®] MTP[®] service Tool (FOCD-STM) Dry Cleaner MPO/MTP[®] (FOCD-DCM) optical fiber video probe

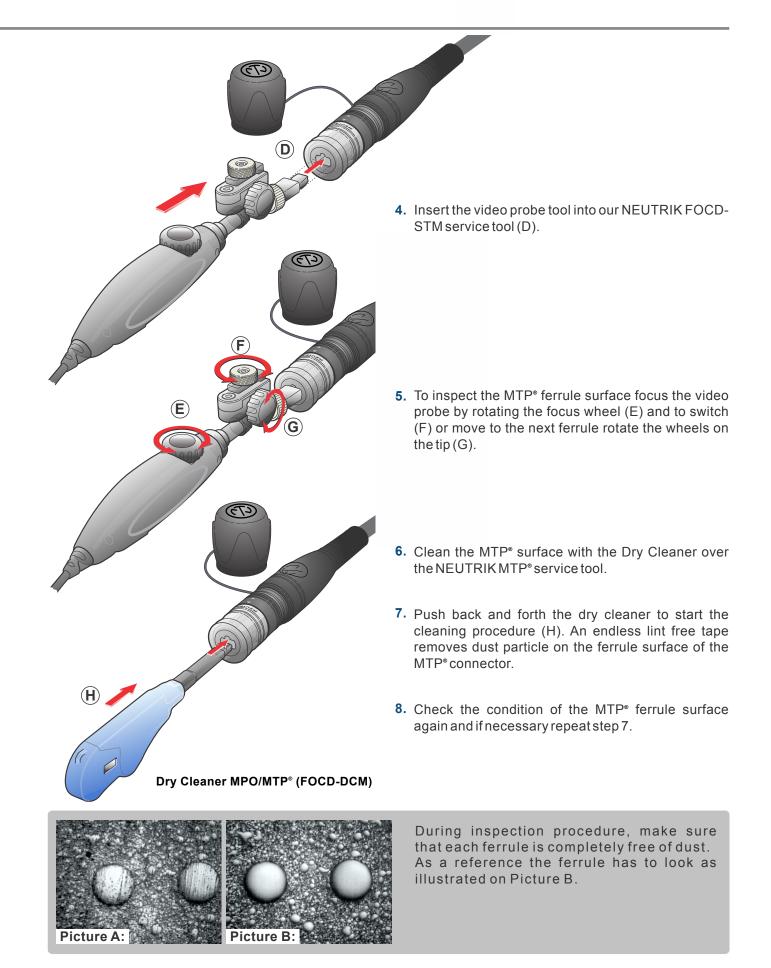

1. Disconnect both cable ends for safety reasons. Invisible laser radiation may be emitted from disconnected fibers or connectors. Do not stare into beams or view directly with optical instruments.

2. Remove dust cap from the connector (A) and mount NEUTRIK FOCD-STM inspection tool on it until it is locked (B).

3. Prepare the optical fiber video probe with the correlate singlemode or multimode tip (C). Under the following QR-code you can find a list with appropriate video probs and tips.

1

9. After the cleaning procedure unlock the NEUTRIK inspection tool (I).

B. Chassis Cleaning

Dry cleaning using FOCD-DCM

- 1. Remove dust cap and insert the tip of the dry cleaning cleaner.
- 2. Guide the tip to the dry cleaner into the chassis housing (A).
- Push back and forth the dry cleaner to start the cleaning procedure (B). An endless lint free tape removes dust particle on the ferrule surface of the MTP^{*} connector.
- **4.** After cleaning procedure, remove dry cleaner and coves the tip with the dust cap.
