

Neutrik Press Release

Neutrik Offers A Crestron Approved Module for their MIC, Line, AES Dante Adapter

Schaan, Liechtenstein, May 2021. Neutrik, the leading supplier of robust and reliable professional connectivity solutions for audio, video, and data, is pleased to announce new options to remote control preamps of their new DANTE network device NA2-IO-DPRO.

Neutrik now features full integration with Crestron control products to remote control the NA2-IO-DPRO, Neutrik's latest addition to networked devices. Designers can now fully integrate the DPRO into a Crestron system and perform various controls such as gain, phantom power, lo-cut, mute and mic/line switch.

"There's no doubt that the future within the Pro AV market is based on interoperability between different devices within an application. We are excited to provide a convenient solution to contractors and system designers for their Crestron installations" says Florian Frick, Product Manager for Neutrik.

The NA2-IO-DPRO is Neutrik's POE powered Dante I/O solution to add more flexibility in a network setup for Line, MIC and even AES signals. Besides their own control software, the NA2-IO-DPRO can be remote controlled from Yamaha CL/QL consoles and from Q-Sys and Crestron control devices. The module is available for free in the Crestron application market.
